out to make it work.. its a free alternative to invesia cusom video creator 2 because it is much better, highly reliable and it is fast, clean and simple to use i think it is false advertising. !info kdenlive kdenlive (source: kdenlive): non-linear video editor. In component universe, is optional. Version 4:16.04.3-0ubuntu1 (yakkety), package size 2059 kB, installed size 6684 kB the link is dead, found it in the mirror you know i t will be easier to deal with this than putting together my own video editor, thanks! cfhowlett: well, I really don't know if it is not true, because I haven't used it for anything, so I haven't used it for video editing and I have never had issues using it with videos. I can't really say if it is a lie or not. cfhowlett, the link is dead, not the program bastel, what video codecs does it support? I don't know, it was built for the x264 avcodec and vlc lol, and it's free that's why i was asking you know I would love to use it as a video editor, but it really was built for the "not my type" people who don't care

about video editing and want something to record game play with their best friend i don't play video games ;P ObrienDave: you could turn it into a video editor with the video codec and video editing software included ;P !info ffmpeg ffmpeg (source: ffmpeg): multimedia player, server and encoder. In component main, is optional. Version 7:2.8.11-0ubuntu0.16.04.1 (yakkety), package size 296 kB, installed size 1604 kB cfhowlett: i think you're confusing ff f3e1b3768c
