dc free download.Q: How to add a new column to a set of numbers using XSLT? I am trying to create an XSLT expression that adds a new column to a set of numbers based on the order of the numbers. So, for example, if the number set is 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12 and the new number to create is 1234, then the result would be 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23 and so on. I have tried using the following expression but this only adds the new number to the end of the set. Could anyone help me? A: If you just want to calculate the sum of the numbers starting at 1 up to a given limit, the following expression should work:
